WHO ARE WE?

Formed by IT industry veterans with decades of industry experience,

Aspire IT academy aims to create a generation of students with skills that are coveted in the software industry.

Our Skilled Experienced Trainers will provide you practical knowledge classes with Real Time Projects, interview question and answers, project case studies and many more to make you technical expert.

WHAT WE DO?

The IT industry account for nearly 70 per cent of campus recruitment in South India, but there is a huge disconnect between what this industry wants and what the universities trains the students for.

We attempt to eliminate this gap. We offer courses that are specifically designed for not just getting a job, but for excelling in IT industry. Apart from the technical training, we also provide courses on communication skills and offer placement counselling

VISION & MISSION

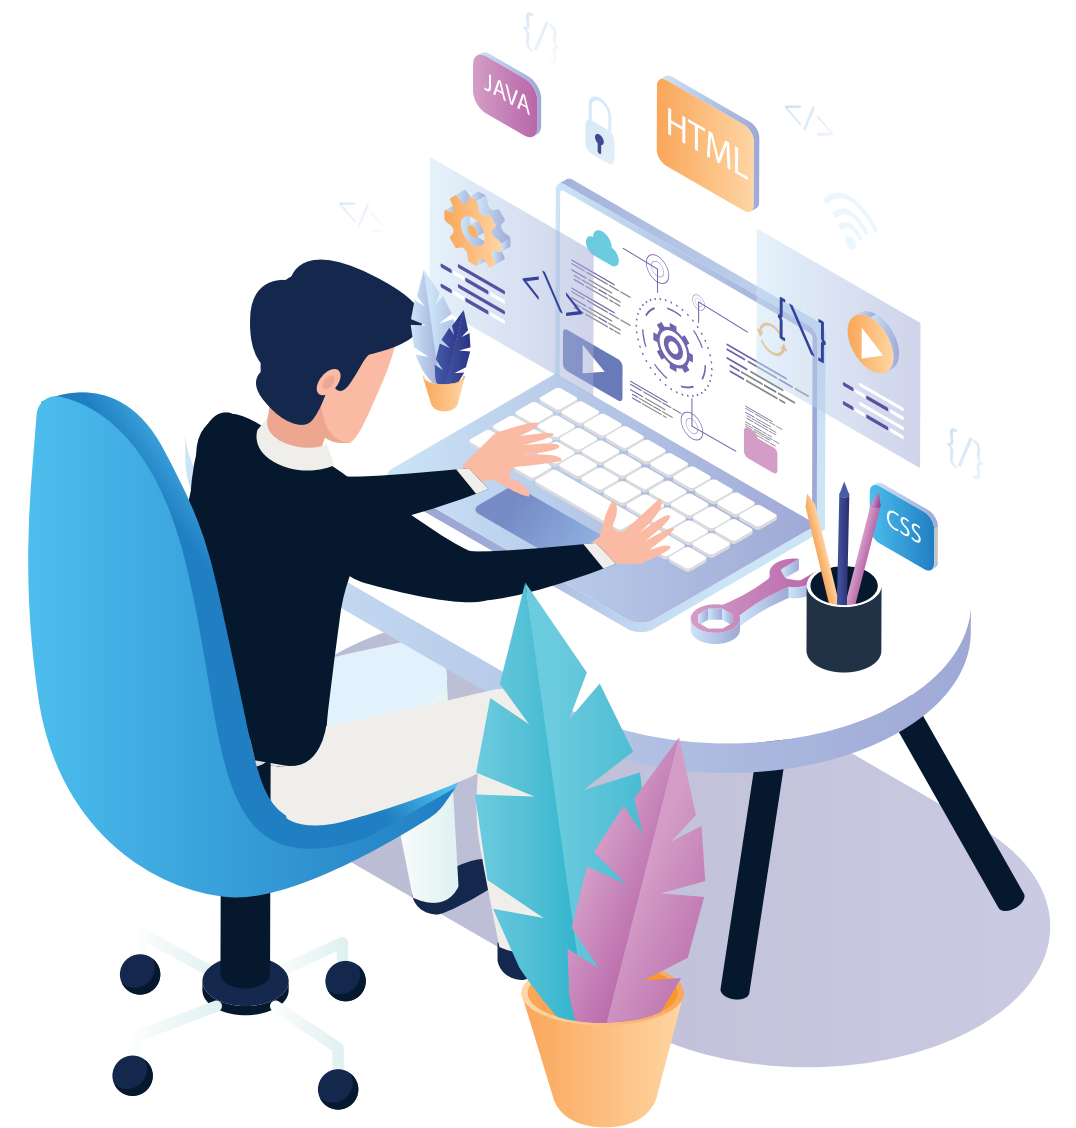

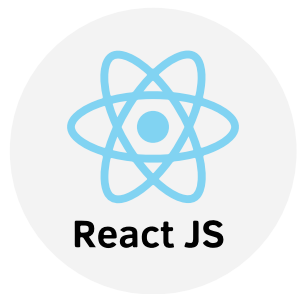

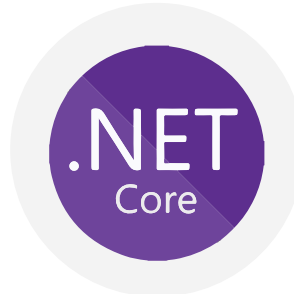

Our training methodology is moduled by a team of experienced industry experts and instructors. It is a perfect balance between theory and hands-on, followed by placement support and continuous guidance. We believe we all learn and understand things differently! That's why we have set up our IT training services to stand out from the crowd.

Currently, the IT industry accounts for nearly 70 percent of campus recruitment in South India. However, there is a demanded disconnect between what this industry wants and the academics. We attempt to eliminate this gap. We offer courses crafted for excelling in the IT industry.

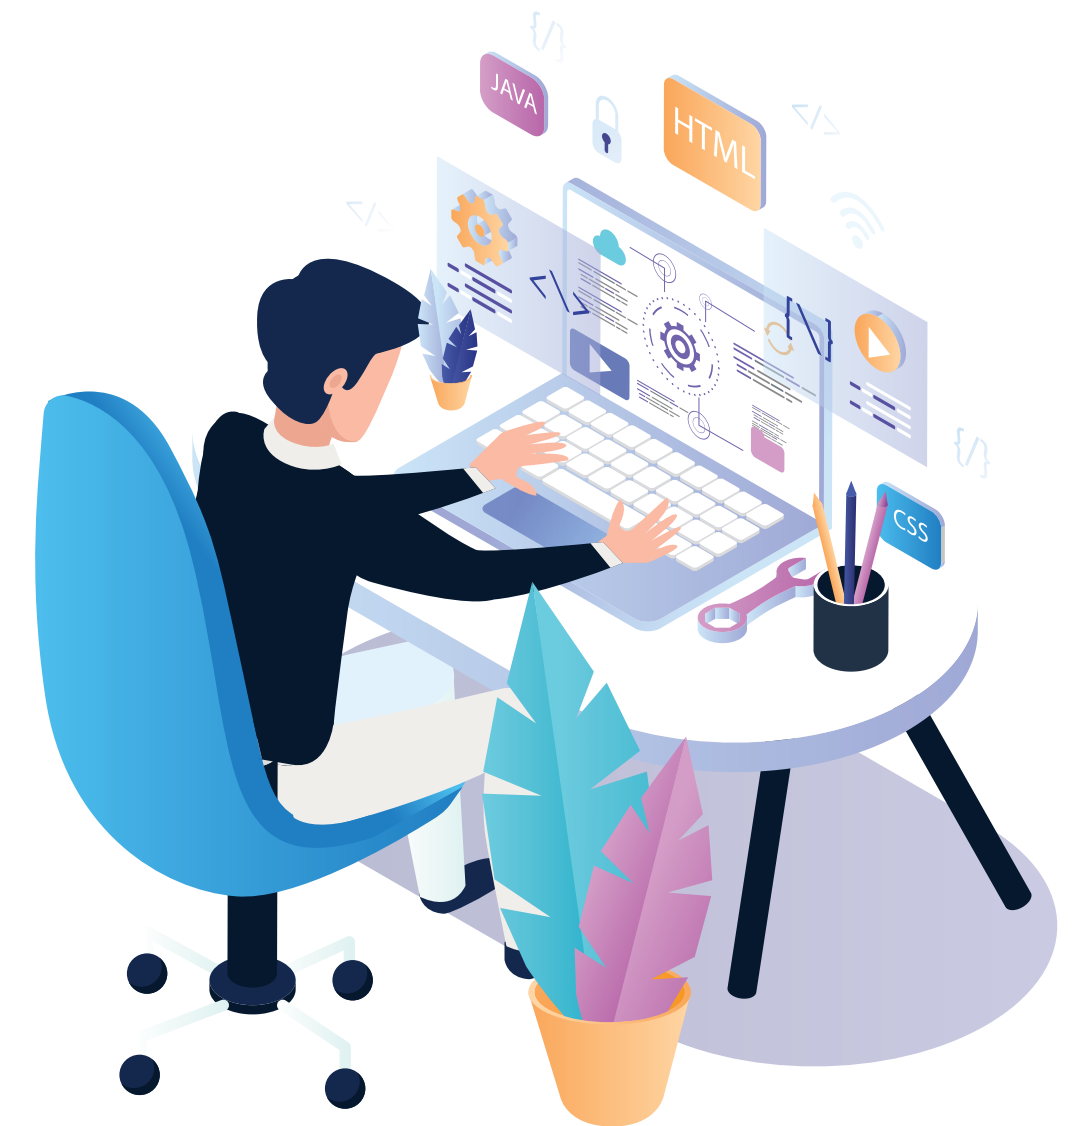

Apart from the technical training, we also provide courses on communication skills, Resume preparation, and placement support. Our mission is to provide 100% placements to students who enroll in our specialized courses.

CORPORATE TRAINING

Provide your team members and employees a golden opportunity, to learn and enhance their hard and soft skills, from the minds of highly experienced trainers and facilitators, only from our corporate training consultants. We are one of the on-demand corporate training companies in India and the credit goes to the broad pool of human resources we have here!

The emerging verticals of various industries in today's market, demand proficient leaders and employees to drive the transformation, in their specific corporate hubs. Not all corporates possess the reservoir of competent staff that cater to the changing business needs.

We are pioneers in creating the most efficient talents in the corporate today. Our strategic and collaborative approach to train the employees to perfection, keeps us leading in the industry. We have expert coaching for all the sectors of IT, right from sales excellence training, soft-skills training to industry-specific technology training.

ACADEMIC PROJECTS

At Aspire IT Academy, we help students all over the world to develop practical skills.

The curriculum in schools and colleges does not allow students to develop the much-needed practical exposure. We help students overcome this challenge and develop these practical skills very easily.

Students can enroll in our online courses and build projects.

Aspire IT Academy helps students to pick projects of their interest and build real working projects from their homes via online courses or directly from our experts by joining our classroom programs.

Through such project building experience, students will learn to solve real problems by applying technology - and become much better engineers.

Positive: Professionalism, Quality

It was really a nice experience I had with Aspire IT Academy. The classes were interesting and reliable. It helped me to know more about the software testing. The teaching skill of Kukku mam is really appreciable.... Thanks to Aspire IT Academy for this wonderful opportunity....

Positive: Communication, Quality

I have completed a course on .Net. It was a wonderful experience. Preethy mam was the one who taught us. She teaches from the basics and an average student will also be able to catch the class very easily. Thank you for your efforts
